

Summary

IT professional with AWS certification and hands-on experience in cloud migration, Linux security hardening, and vulnerability assessment. Background in business operations and client relations, now specializing in cloud engineering and cybersecurity. Skilled at applying security-first solutions in real-world projects, with strong communication skills in English and Thai. Currently self-learning, focusing on data analytics.

Technical Skills

- **Cloud & Virtualization:** AWS Solution Architect, AWS (EC2, S3, RDS, IAM, VPC, WAF, Auto Scaling, VMware, VirtualBox)
- **Security:** Vulnerability Assessment, Penetration Testing, Incident Response, Risk Management, Compliance Frameworks
- **Operating Systems:** Linux (Ubuntu, CentOS, SELinux, iptables), Windows Administration, Systems Engineering
- **Networking:** TCP/IP, DNS, DHCP, VPN, Firewalls, SSL/TLS, IDS/IPS, Client-server Solutions
- **Programming & Scripting:** Python, JavaScript, C++, HTML, CSS
- **Databases:** SQL, Amazon RDS, AWS DMS, Database Migration
- **Web Technologies:** JSON, Web Design, WordPress

Professional Experience

- **Marketing & Business Operations Specialist | Self-Employed | Vienna, VA | Jan 2017 – Aug 2023**
 - Managed product sourcing, supplier negotiations, and pricing strategy.
 - Created and managed brand identity, including logo design, digital marketing, and online presence.
 - Provide ongoing remote support after relocating to the U.S., assisting with operations and marketing strategy.
- **Other Experience:** Customer Service & Technical Operations Specialist (2014–2014), Au-Pair (2014–2015)

Technical Projects

- **AWS Cloud Migration** – Migrated 1TB financial dataset to AWS using DMS & Migration Hub; reduced infrastructure costs by 50% while ensuring encryption with AWS KMS.
- **Database Migration** – Consolidated multiple legacy databases into Amazon RDS; improved reliability and reduced downtime.
- **Linux System Administration** – Deployed and configured secure Linux servers with SELinux and firewall rules.
- **Python Meal Planning Application** – Built an application for nutritional tracking and cost calculation with API integrations for automated grocery lists. Applied Object-Oriented Programming (OOP) principles and modular design.

Education

- **Northern Virginia Community College (NOVA)** — Summa Cum Laude, GPA 4.00
Associate of Science in Information Systems Technology: Cloud Computing, May 2025
- **Rattana Bundit University**
Bachelor of Arts in Business Administration, May 2013

Certifications

- Network Administration (Career Studies Certificate)
- AWS AI Practitioner | expected June 2026
- AWS Certified Cloud Practitioner
- AWS Solutions Architect – Associate | expected August 2026

Volunteer Experience

- FIFA Futsal World Cup 2012 – Coordinated logistics and supported operations in a fast-paced, multicultural environment. •
- NSDF Thailand Para Badminton International – Assisted event coordination for adaptive sports, supporting athletes with disabilities.

Additional Information

- **Languages:** English (Professional), Thai (Native)
- **Work Authorization:** U.S. Permanent Resident (Green Card Holder)
